Our Company

Since Ultimate Washer, Inc. has been in business, our focus has been mainly on online retail sales of pressure washing systems, pressure washers, surface cleaners, generators, attachments and cleaning solutions. Our goal is to become your unique source of such equipment for the pressure washing community as well as for commercial pressure washer users. We offer the best competitive prices and professional service.

Our Website

Ultimatewasher.com is your one-stop online superstore and the place with the most valuable tips and advice. We will help you choose the right model to suit your particular needs. We are eager to provide a solid foundation of product availability through effortless internet shopping, with emphasis on good website design, and easy and user friendly navigation of our online store at:

www. ultimatewasher.com

Our Store

Ultimate Washer’s main office is located in Jupiter, Florida. Our showroom enhances the value and quality of services we bring to our customers.

Customer Service Information

Ultimate Washer INC
711 Commerce Way East Unit 1, Jupiter, FL 33458
Our store is open from 8:30 a.m. to 5:30 p.m. EST
Monday through Friday

Ordering Information

Order Online 24/7 on www.ultimatewasher.com
Call us also 24/7 at 866-858-4982 (Toll Free) or 561-471-7022 (Local - Florida)
Fax us at 561-741-2125

Electric Units

Direct Drives
- Hand Carry: Pressure Range 1000-1500 PSI
- Hoop Handle: Pressure Range 1100-1500 PSI
- Kranzle Electric: Pressure Range 1400-2000 PSI
- Large Frame: Pressure Range 2000-6000 PSI
- Tube Cart: Pressure Range 1000-3500 PSI
- Wall Mounts: Pressure Range 1000-3000 PSI
- Base Mounts: Pressure Range 1500-3000 PSI
- MX Cart: Pressure Range 1000-2000 PSI

Belt Drives
- Pressure Washer: Pressure Range 2000-6000 PSI
- Tube Cart: Pressure Range 5000-6000 PSI
- Large Frame: Pressure Range 2000-6000 PSI
- High Pressure: Pressure Range 4000-9500 PSI

Gasoline Units

Direct Drives
- Kranzle Gas Powered: Pressure Range 2000-2500 PSI
- Stainless Steel: Pressure Range 2500-3000 PSI
- Aluminum/Powder Coated Frame: Pressure Range 2600-4000 PSI
- LCT & Powerease: Pressure Range 2700-4000 PSI
- Pro-Skid Modular: Pressure Range 2400-5000 PSI
- Pickup Mount: Pressure Range 2400-5000 PSI

Belt Drives
- Aluminum Frame: Pressure Range 3000-4000 PSI
- Stainless Steel: Pressure Range 3000-4000 PSI
- Cool Drive: Pressure Range 3500-4000 PSI
- High Volume Belt: Pressure Range 2500-3000 PSI
- CBA Series: Pressure Range 3000-4000 PSI
- Tube Cart: Pressure Range 3500-7000 PSI
- High Pressure: Pressure Range 5000-9000 PSI
- Trailer Mount: Pressure Range 2500-4000 PSI

Hydraulic Units and Air Driven

Tow Behind: Pressure Range 2500-3000 PSI
Hydraulic: Pressure Range 1200-4000 PSI
Air Driven: Pressure Range 1000-2000 PSI

Information
Customer Information
Electric
Electric pressure washer equipment systems are designed with the wide range of PSI and flow rate. They can be used for light, medium and heavy-duty jobs. The only limitation is that they can be used where electric power source is available. Nevertheless, since they don’t have a gasoline tank you can use them and store them indoors without worrying about the fire hazard. The advantage over other types is that they are very economical to operate and are traditionally less expensive.

Gasoline
If you want a unit with more PSI consider a mobile gas pressure washer. They are designed for cleaning large areas in remote surroundings where no electricity is available. High power washers usually have higher performance ratings, faster cleaning times, and industrial parts and attachments. They offer a convenience of independency and easy maneuverability.

Diesel
Diesel mobile pressure washer units are designed for the same cleaning applications as our mobile gas power washers, but they are equipped with extended life diesel engines. Large diesel motors allow higher flows and pressures not possible with gasoline powerwashers. These versatile models are intended for every day and 8 or more hours a day use. They are the best built powerwashers in powerwashing industry and are very popular among pressure cleaning contractors and are heavily used by the US Military.

Hydraulic
Hydraulic powerwashers are designed for jobs where the power washing equipment’ mobility is a necessity and which do not require an electric power source. As such, they are the most suitable for jobs in mines, construction, agriculture and farm equipment powerwash cleaning. This hydraulic unit simply transforms hydraulic pressure and flow to water pressure. As such, it allows you to clean your equipment thoroughly in the field with limited risk of releasing chemical residue to the environment.

Air
Pneumatic power washer or commonly known as air pressure washers is unique by the virtue of how the pump is powered. The entire system does not require electricity or gas to produce pressurized water. Simple air driven motor is used to turn the pump which conversely converts an ordinary garden hose pressure into a powerful 2000 pounds per square inch pressure. A 3 GPM water flow allows for easy and productive pressure washing. Air pressure washers are light weight, economical and easy to operate. The greatest advantage is its quiet operation and ability to use it in applications where gas and diesel powered machines are prohibited due to hazardous conditions such as in chemical, paint and nuclear plants, and also in mines and oil platforms and refineries.
Glossary Terms

Ultimate Washer pressure washer glossary of terms provides you with a collection of textual glosses and specialized terms with their meanings. Use the following terminology and keywords as your pressure washer dictionary.

Direct Drive
In direct drive pressure washer systems the pump is connected directly to the engine. So, the pump spins at the same speed as the engine, usually around 3,800 RPM. This system has the advantage of being simple, with few moving parts; therefore, less expensive. The disadvantage is by having the pump spin as much as the engine the bearings get more wear and tear, reducing the life span of the pump.

Belt Drive
Belt driven pressure washers use pulleys and belts to slow the speed of the pump. Where the engine spins at 3,800 RPM the pump will be slowed to 1,400 to 1,900 RPM depending on the pulley and belt setup. This system ensures long pump life because the bearings do not get as much wear and the pump is isolated from the heat of engine, being separated by the belts and pulleys.

Thermal Relief
A technique used to reduce the build-up of high temperature water within a powerwasher pump caused when the spray gun trigger is closed. Cycles water through pump when water reaches maximum water temperature. Some of our models have pumps designed to work with the water temperature of 145°F, 160°F and some as much as 180°F. Warm water will discharge from pump onto ground. This system prevents internal pump damage.

Unloader
A device used to relieve the water pressure within the pump whenever spray flow is blocked. It allows the engine or motor to continue running even when the operator lets go of the trigger on the spray gun and stops washing. It diverts the pressure, that would build up without the unloader, by taking the water from the exit side of the pump and loops it back to the inlet side in a continuous “bypass” mode. The unloader also returns the flow of water to the gun when the operator is ready to clean again.

Chemical Injector
The chemical injector, which comes standard with many of our pressurewashers, allows soap or chemical to be injected into the water stream making cleaning even faster and easier. For units with a straight through wand, the operator must switch to a soap nozzle to draw chemical with the injector.

Safety Relief Valve
The safety relief valve is the designed weak point in the pressure washer. If the unloader malfunctions, the safety relief valve will open and relieve system pressure safely.

GPM
Gallon Per Minute. More water per minute can mean faster cleaning, especially when washing off materials like mud and road tar. The following chart shows how more gallons per minute can reduce your cleaning time. (The times shown are estimates only. Variation in job size, conditions and operator skill will affect the results)

Pressure (PSI)
The unit for pressure is PSI (pounds per square inch), which actually determines how much pressure is directly applied on the surface being cleaned. The pressure that is delivered by the machine is directly responsible for breaking the bond between the debris and the object being cleaned. Our models typically have a pressure range from 1000 to 5000 PSI.

Self-Priming
Refers to the ability of a pump to separate air from water and create a partial vacuum or low-pressure area in the pump body. This causes water to flow to the impeller and on through the pump.

Self-Priming
Refers to the ability of a pump to separate air from water and create a partial vacuum or low-pressure area in the pump body. This causes water to flow to the impeller and on through the pump.

Totally Enclosed Electric Motors
These motors will be used in applications similar to drip-proof motors and are recommended for any outdoor use. These will have no cooling vents instead they have an internal cooling fan and no contamination is able to enter the motor at all.

Viton O-rings
High temperature rubber o-rings designed for extreme heat. Buna O-rings can be used for lower temperatures. Viton is rated to 300 degrees F. Auto Start/Stop: This will allow the unit to start automatically when trigger is pulled, and will shut down automatically when trigger is released.

Biodegradable
Capable of being broken down by living microorganisms, such as water, air, and soil.

Cavitation
Pressure Washer: The shock of thousands of bubbles collapsing inside the pump quickly pitting metal surfaces and seals. Also known as starving the pump, is caused by lack of water at the inlet of the pump Parts Washer: A process of creating and implosive cavitation which are caused by the jet of water impinging inside the pump quickly pitting metal surfaces and seals. Also known as starving the pump, is caused by lack of water at the inlet of the pump Parts Washer: A process of creating and implosive cavitation which are caused by the jet of water impinging in a region where the pressure of the liquid falls below its vapor pressure.

Check Valve
A check valve allows air to flow in one direction but not the opposite direction.

Cleaning Units
Cleaning abilities achieved by the pressure washer. Use simple formula to determine the total cleaning units produced by your machine: cleaning units (CL) = pressure (PSI) x water volume (GPM).

Cycle
One complete reversal of alternating current of voltage, from zero to a positive maximum to zero to a negative maximum back to zero. The number of cycles per second is the frequency, expressed in Hertz (HZ). A single complete operation consisting of progressive functions starting and ending at the neutral position.

Friction Loss
The loss of pressure or head due to the resistance to flow in the pipe and fittings. Friction loss is influenced by pipe size and fluid velocity and is usually expressed in feet of head.

GFCI
Ground Fault Current Interrupter (GFCI) protects user from accidental electrocution (for electric powered pressure washers only). More information on ground fault current interrupters.

Inverter
Designed to convert 12V DC power into 110V AC, inverters are normally wired to the charging system on any automobile. Inverters should be used only in light duty, short-term usage situations. Joint Penetration The minimum depth a weld extends from its face into the joint, excluding reinforcement.

Liquid Propane
A heating fuel that is derived from natural gas, widely used because of its portability.
Hand Carry
- 1450 PSI @ 2 GPM and 2 HP
- Triplex plunger pump with ceramic plungers and stainless steel valves
- 35° Power cord with ground fault interrupter for operator safety
- 26° Non-marking pressure hose
- Adjustable pressure
- Chemical Injection

**16” Whirl-A-Way**

- Used to clean flat surfaces quickly, easily and evenly. 16” diameter with nylon brush skirt. These high pressure surface cleaners are the most economical unit on the market today. It is inexpensive and will complete any job that has been placed in front of it.
- Minimum Requirements: 1,800 PSI at 2.0 GPM
- Maximum Requirements: 4,000 PSI at 8.0 GPM, 180 °F
- Color: Yellow Housing, Blue Handle
- Rotary arm: 13”, with 2 meg nozzle #BE-85-225-025
- Brush: Nylon
- Weight: 26.5 lbs
- Parts Breakdown
- Click to view 360 Version
- Optional: Nozzle Unclogger Tool (ensures the longevity of your nozzles)

When you have to keep it clean, nothing does the job better than Ultimate Washer high-pressure cleaning hose for water cleanup applications in variety of power washing jobs. Depending on your need, our durable, reliable hose line handles pressures up to 5000 PSI, temperatures up to 300° F, and can be used with hot or cold water, and mild detergents. All extensions come equipped with bend restrictors on both ends. Reduced outside diameter (OD) makes hoses lighter to use but at the same time they maintain strength and flexibility.

**Non-marking Pressure Hoses**
- These hoses have a working pressure of 4000 PSI to 5000 PSI and are oil resistant with a no-mark cover. They are ideal where they come in contact with cleaning solutions used in the pressure washer industry. NON-MARKING pressure hose gives your power washing equipment more professional appearance.
  - Max Pressure: 4000 PSI
  - Max Temperature: 220° F
  - Color: Blue (50 ft) Gray (100 ft)
  - Size: 3/8”
  - Length: 50 FT or 100 FT
  - Bend Restrictors: Yes (both ends)
  - Ordering Information - FREE SHIPPING

**MODEL**        **DESCRIPTION**

BE-85-238-154K  50 FT Pressure-hose, Wire braid - color blue with 3/8” Brass Couplers
BE-85-238-114K  100 FT Pressure-hose, Wire braid - color gray - Non Marking, with 3/8” Brass Couplers
Gasoline Units: Belt Drive

**Aluminum Frame**
- 4000 PSI at 4 GPM
- Engine: Pull Start Honda GX390 (3 year warranty)
- Industrial Triplex Pump: General or AR (5 year warranty)
- Belt Drive

**Aluminum Frame**
- 4000 PSI at 4 GPM
- Engine: Pull Start Honda GX390 (3 year warranty)
- Cat Belt Drive Pump (5 year warranty)
- Belt Drive
- Chemical Injector Kit
- Adjustable Pressure
- Thermo Relief Valve

**Aluminum Frame: Polychain**
- Minimum: 2000 PSI, 8.0 GPM, 20 HP
- Maximum: 3500 PSI, 15.0 GPM, 30 HP
- Engine: Kohler or Honda (depends on model)
- Pump: GP or CAT (5 year warranty)
- Polychain Belt Drive 10,000 hour rated (2 year warranty)
- Chemical Injector Kit
- Electric start standard on HP Honda, and 27, 30 HP Kohler engines
- Adjustable Pressure Regulator
- Thermo Relief Valve
- Safety Relief Valve

**Stainless Steel Large Frame**
- 4,000 PSI at 4.0 GPM
- Honda Engine - GX390 (3 year warranty)
- Industrial Cat Pump (5 year warranty)
- 16,000 Cleaning Units
- Chemical Injector Kit
- Oil Alert (low oil shutdown)
- EZ Start Adjustable Unloader
- 50 FT High Pressure Hose
- 4 Quick-Connect Spray Tips
- 36” Insulated Lance
- 10” Tubed pneumatic tires
- Stainless Steel Frame
- Belt Drive
- Weight: 200 lbs

**Aluminum Frame: Clutch Drive Pressure Washers w/ Auto Start-Stop**
- 4000 PSI at 4 GPM
- Engine: Honda GX390 (3 year warranty)
- Industrial Triplex Pump: General or AR (5 year warranty)
- Clutch Drive System
- Electric Start
- Chemical Injector Kit
- Adjustable Pressure
- Thermo Relief Valve
- Safety Relief Valve
- E-Z Start (more info)
- Low oil shutdown
- 50 FT Steel Braided Hose
- 4 Quick-Connect Spray Tips

**Aluminum Frame**
- 14,000 Cleaning Unit
- Chemical Injector Kit
- Oil Alert (low oil shutdown)
- EZ Start Adjustable Unloader
- Stainless Steel Chemical Injector
- Stainless Steel plumbing

**All Stainless Steel Components**
- Relief Valve
- Oil Alert (low oil shutdown)
- EZ Start Adjustable Unloader
- Stainless Steel Chemical Injector
- Stainless Steel plumbing

**Cool Drive**
- Oil Alert
- Adjustable Pressure
- 50 FT Non-marking Pressure Hose
- 4 Quick-Connect Spray Tips
- 36” Insulated Wand & Gun
- 13” Pneumatic Tires
- Heavy Duty Powder Coated Frame

**Cool Drive**
- Chemical Injector Kit
- Oil Alert
- Adjustable Pressure
- 50 FT Non-marking Pressure Hose

### Gasoline & Diesel Units

#### Trailer Mounted
- **Thermal Relief Valve**
- **Adjustable Pressure**
- **Chemical Injection**
- **Swivel Hose Reel (turns 360°)**
- **Trigger Gun and Multi-reg 0 to 60° pattern tip with Hi-Low for chemical injection**

#### Diesel Units: High Pressure
- **4000 PSI, 18.0 GPM and 66 HP**
- **Electric Start with a 60 AMP Charging System**
- **Low Oil Shutdown**
- **Triplex Plunger Heavy Duty Pump (1 Year Warranty)**
- **Pressure Relief Valve**
- **Safety Engine Shutdown**

#### Diesel Units

#### Diesel Units: High Pressure
- **10,000 PSI, 8.0 GPM and 66 HP**
- **Perkins Diesel Engine 4 Cylinder, Cast Iron Cylinder, Lo-Tone Muffler, Cyclonic Air Cleaner, PTO Clutch (2 Year Warranty)**
- **Electric Start**

#### Diesel Units: High Pressure
- **Max Pressure: 5000 PSI**
- **Max Flow: 5.0 GPM**
- **Engine: 27 HP Kohler OHV w/ Electric Start (3 Year Warranty on Parts and Labor).**
- **PUMP: Triplex ceramic plunger belt driven pump. (5 Year Warranty).**
- **FRAME: Stainless Steel frame with lifetime warranty.**
- **WATER INLET: Unit needs to be positively fed. (Water tanks are necessary)**
- **50' Steel Braided Pressure Hose**
- **Gun and wand assembly with nozzle variety**

#### Diesel Units: High Pressure
- **7000 PSI, 9.0 GPM and 51 HP**
- **Electric Start**
- **Low Oil Shutdown**
- **Dual Triplex Plunger Heavy Duty Pump (5 Year Warranty)**
- **Pressure Relief Valve**
- **Safety Engine Shutdown**
- **Frame: "Cage Style" State of the Art, Stainless Steel, Unitized Body Minimizes Weld Stress (Lifetime Warranty)**

#### Diesel Units: High Pressure
- **10,000 PSI, 8.0 GPM and 66 HP**
- **Honda engine (2 year warranty) Triplex Plunger Pump with Ceramic Plungers and Stainless Steel Valves (5 year warranty)**
- **Thermal Relief Valve**
- **Adjustable Pressure**
- **Chemical Injection**

#### Gas Trailer Mounted
- **DUAL 4000 PSI at 4.0 GPM**
- **Battery included for Electric Start Model**
- **Pump: General Industrial Pump with Ceramic Plungers and Stainless Steel Valves (5 year warranty)**
- **2x Triplex Plunger General Pump with Ceramic Plungers and Stainless Steel Valves (5 year warranty)**
- **Thermal Relief Valve for pump protection**
- **Adjustable Pressure**
- **2x Chemical Injection**
- **2x Hose Reels with 250 FT capacity**
- **2x 200 FT High Pressure Hose**
- **2x Trigger Guns and 36” Wands, 0°, 15°, 40° Tips and Soap Nozzle**

Large Rotary Nozzle

- This tool is the most popular design in our selection. It is made of high quality ceramic that will extend the life of the tip. It will handle any pressure of up to 4500 PSI. It is great for homeowners and professionals!
- Min Pressure: 2000 PSI
- Max Pressure: 4500 PSI
- Max Temperature: 212° F
- Min Flow: 2.7 GPM
- Max Flow: 8 GPM
- Astounding 4000 RPM cleans deeper and faster
- Wear-resistant ceramic nozzle and rugged housing for longer life
- Weight: 1.10 lbs
- Patent spring loaded nozzle can be started in any position

**FEATURED ITEM**
COMPANY POLICY: 100% Satisfaction Guarantee

If after you purchase any product from Ultimate Washer, at any time within 30 days, you feel that, for any reason, it fails to live up to your expectations, return it to us and we will immediately refund your money. The following conditions apply:

- All products need service that are under warranty must be taken to a warranty center listed in your manual.
- All specialty ordered or custom items are non-refundable / non-returnable.
- All returns must have a return merchandise authorization number issued (RMA) written on the box.
- RMA is void if product is not returned within 14 days of RMA being issued.
- No returns after 30 days of purchase. Products must be returned in new condition and in the original box (never been used).
- Credit cannot be issued if product is missing instructions, the box, any hardware, and/or is damaged in any way.
- Books, DVD’s, Contractor Forms cannot be returned for any reason.
- All returns are subject to a 25% restocking charge.
- Shipping is non-refundable.
- Customer is responsible for return shipping cost.
- Products returned to us without a return merchandise authorization number (RMA) will be refused.
- Products being returned must be shipped by UPS Ground or Freight.
- Products refused by the customer upon delivery are subject to a 25% restocking fee and all shipping charges.
- If the shipping company is not able to deliver due to no fault on our part, the customer is subject to return shipping and reshipment charges.
- Any returned check is subject to $50 surcharge.
- Credit Card Orders: Cancellation will incur a six percent (6%) credit card fee deducted from any refund due and owing.
- Cancellation fee of $50 for any standard product cancelled after confirmation of order. (for processing of paperwork).

If your shipment contains a defective product or we sent you the wrong product:

Return the defective item and we will replace it at no cost to you. We will issue an RMA. Items must be in the original packaging, in as-new condition with the packaging slip, all warranty cards, and accessories (if applicable)

Please allow approximately 7-10 business days for your return to be processed once it has arrived at the warehouse. Customer must ship back the product within 14 days of the replacement product being shipped. If the defective product is not shipped within this 14 day period we will charge the customer for the broken item.

If we supply our UPS account for return, you must use UPS Ground only. Any delivery service upgrade will result in customer being charged for that service.

There are two options available to handle returns in these cases:

Option 1: Place order for replacement item to ship immediately by providing credit card information. This will alleviate wait time for return processing. We will issue credit upon receipt of the returned item and assessment.

Option 2: Send defective or incorrect item first, wait for return evaluation. Once we complete assessment we will send replacement / repaired part depending on warranty evaluation.

Exchanges:

Ordered the wrong product? If you request a replacement, we will ship it after we receive and process your returned product. If you need a replacement right away, we suggest you request a credit (rather than a replacement), when you obtain your RMA number. Then, place a new order. The new order will be shipped as soon as we have the product available and a credit will be applied approximately 7-10 days after we receive the product(s) you are returning in their original condition within 30 days. Damaged items will not be refunded if they are in unsealable conditions. We recommend you insure your package.

Warranty

At Ultimate Washer, we only distribute top quality industrial/commercial/personal pressure washers that are designed for light and heavy-duty use, maximum reliability, durability and long life. Our pressure washers are built for lowest possible price and are suitable for all duty applications and steady use due to higher quality levels. The manufacturer of this product agrees to repair or replace designated parts that prove defective within the warranty period listed in the chart below. Specific limitations and exclusions apply. This warranty covers defects in material and workmanship and not failure due to normal wear, depreciation, abuse, accidental damage, negligence, improper use, maintenance or storage. To make claim under the terms of the warranty, all parts said to be defective must be returned to a designated Warranty Service Center for warranty inspection. The judgments and decisions of the factory-authorized personnel concerning the validity of warranty claims are final. Items not covered by the warranty given us include: Motors, engines and pumps: These components are covered by warranties given by their respective manufacturers. These warranties pass through to the end user. As a factory-authorized and trained warranty service center the factory will honor the terms of all component warranties and satisfy claims of the appropriate warranty provisions. Normal wear items include but are not limited to: hoses, nozzles, filter, valves, seals and are not covered by this warranty. This warranty is in lieu of all other warranties, express or implied, including without limitation any warranties of merchantability or fitness for a particular purpose and all such warranties are hereby disclaim ed and excluded by the Manufacturer. The Manufacturer’s warranty obligation is limited to repair and replacement of defective products as provided herein and the Manufacturer shall not be liable for any further damages, including damages from shipping, accident, abuse, acts of God, misuse or neglect. Neither is damage from repairs using parts not purchased from the Manufacturer or alterations performed by non-factory authorized personnel. Failure to install and operate equipment according to the guidelines put forth in the instruction manual shall void warranty. This warranty does not cover the following: machines used for rental purposes, damage resulting from shipping (claims must be filed with freighter), accident, abuse, acts of God, misuse or neglect. Neither is damage from repairs or alteration performed by non-factory authorized personnel or failure to install and operate equipment according to the guidelines put forth in the instruction manual. The manufacturer will not be liable to any persons for consequential damage, for personal injury or for commercial loss.

Website Security:

Ultimate Washer Inc. uses the latest security technology - a Digital ID and the Secure Sockets Layer (SSL) protocol. We have our own SSL certificate for security. Our digital ID features today's strongest cryptographic techniques to ensure your information isn’t tampered with. With our use of SSL, shoppers are assured that no unauthorized entity has access to their information. The powerful combination of these two technologies protects sensitive information such as an account information and credit card numbers against eavesdroppers.

Personal Information:

We never rent or sell our customers’ data to anyone. All information held is strictly confidential.

Financial Information:

If you pay by check or money order, we will ship orders as soon as the check is cleared. Make checks payable to: Ultimate Washer Inc. For Purchase Orders, we would need a D&B number and 3 credit references. Ultimate Washer Inc offers a convenient pressure washer financing program for personal, commercial and industrial users. Simply fill out the application form you can find at www.ultimatewasher.com/warranty

Free shipping includes shipping to 48 US continental states (not including Alaska and Hawaii). US Postal Service may not be available when shipping outside the continental U.S. Due to our shipping from different warehouses throughout the country, you may receive separate packages. We reserve the right to change this policy at any time without notice.
